

An abstract painting with a rich, textured surface. The color palette is dominated by warm, earthy tones such as ochre, sienna, and terracotta, with cooler accents of blue and white. The brushwork is visible and expressive, creating a sense of depth and movement. In the upper left, there's a small, stylized sun-like motif. In the lower right, a circular form with a blue wavy line inside is visible. The overall composition is dense and layered.

**SELECTED
WORKS**

This portfolio is a non-exhaustive view of my most relevant work from 2022-2023, of which are currently held in private collections.

This includes commissioned client work and work otherwise purchased for private enjoyment.

One of the deepest joys of my life is creating art that exists to be enjoyed in the quiet and intimate moments of other people's lives.

Paintings which in some way or another create a monument out of a feeling, an anchor out of a vision - and represent the collaboration between the collector's sense of self and my brushstrokes & paint.

I believe that any space with intentional art is better for it. Much delight and satisfaction can be derived from the simple act of indulging in the visual sense

~ A sort of ceremony~

My collectors find great amusement, peace, and pleasure in having these paintings in their homes, where they can delve fully into the intricacies and nuance of each square inch of the canvas.

I hope to create with you soon. Thank you!

PORTALS OF THE RADIANT FORM

34"x 36" Acrylic/Latex on Canvas
Summer 2023

Custom for Hassan - San Diego

Hassan shared a story with me of the transformation of self he had undergone in his journey of practicing Stoicism, in hopes of commemorating it through a piece of artwork which embodied the radiant newfound freedom he felt in his life.

He asked which colors emulate the essence of freedom for me, and what that word meant for me in my own life?

When I visualize the experience of freedom, I feel a visceral sense of lightness, it feels bright and golden and expansive.

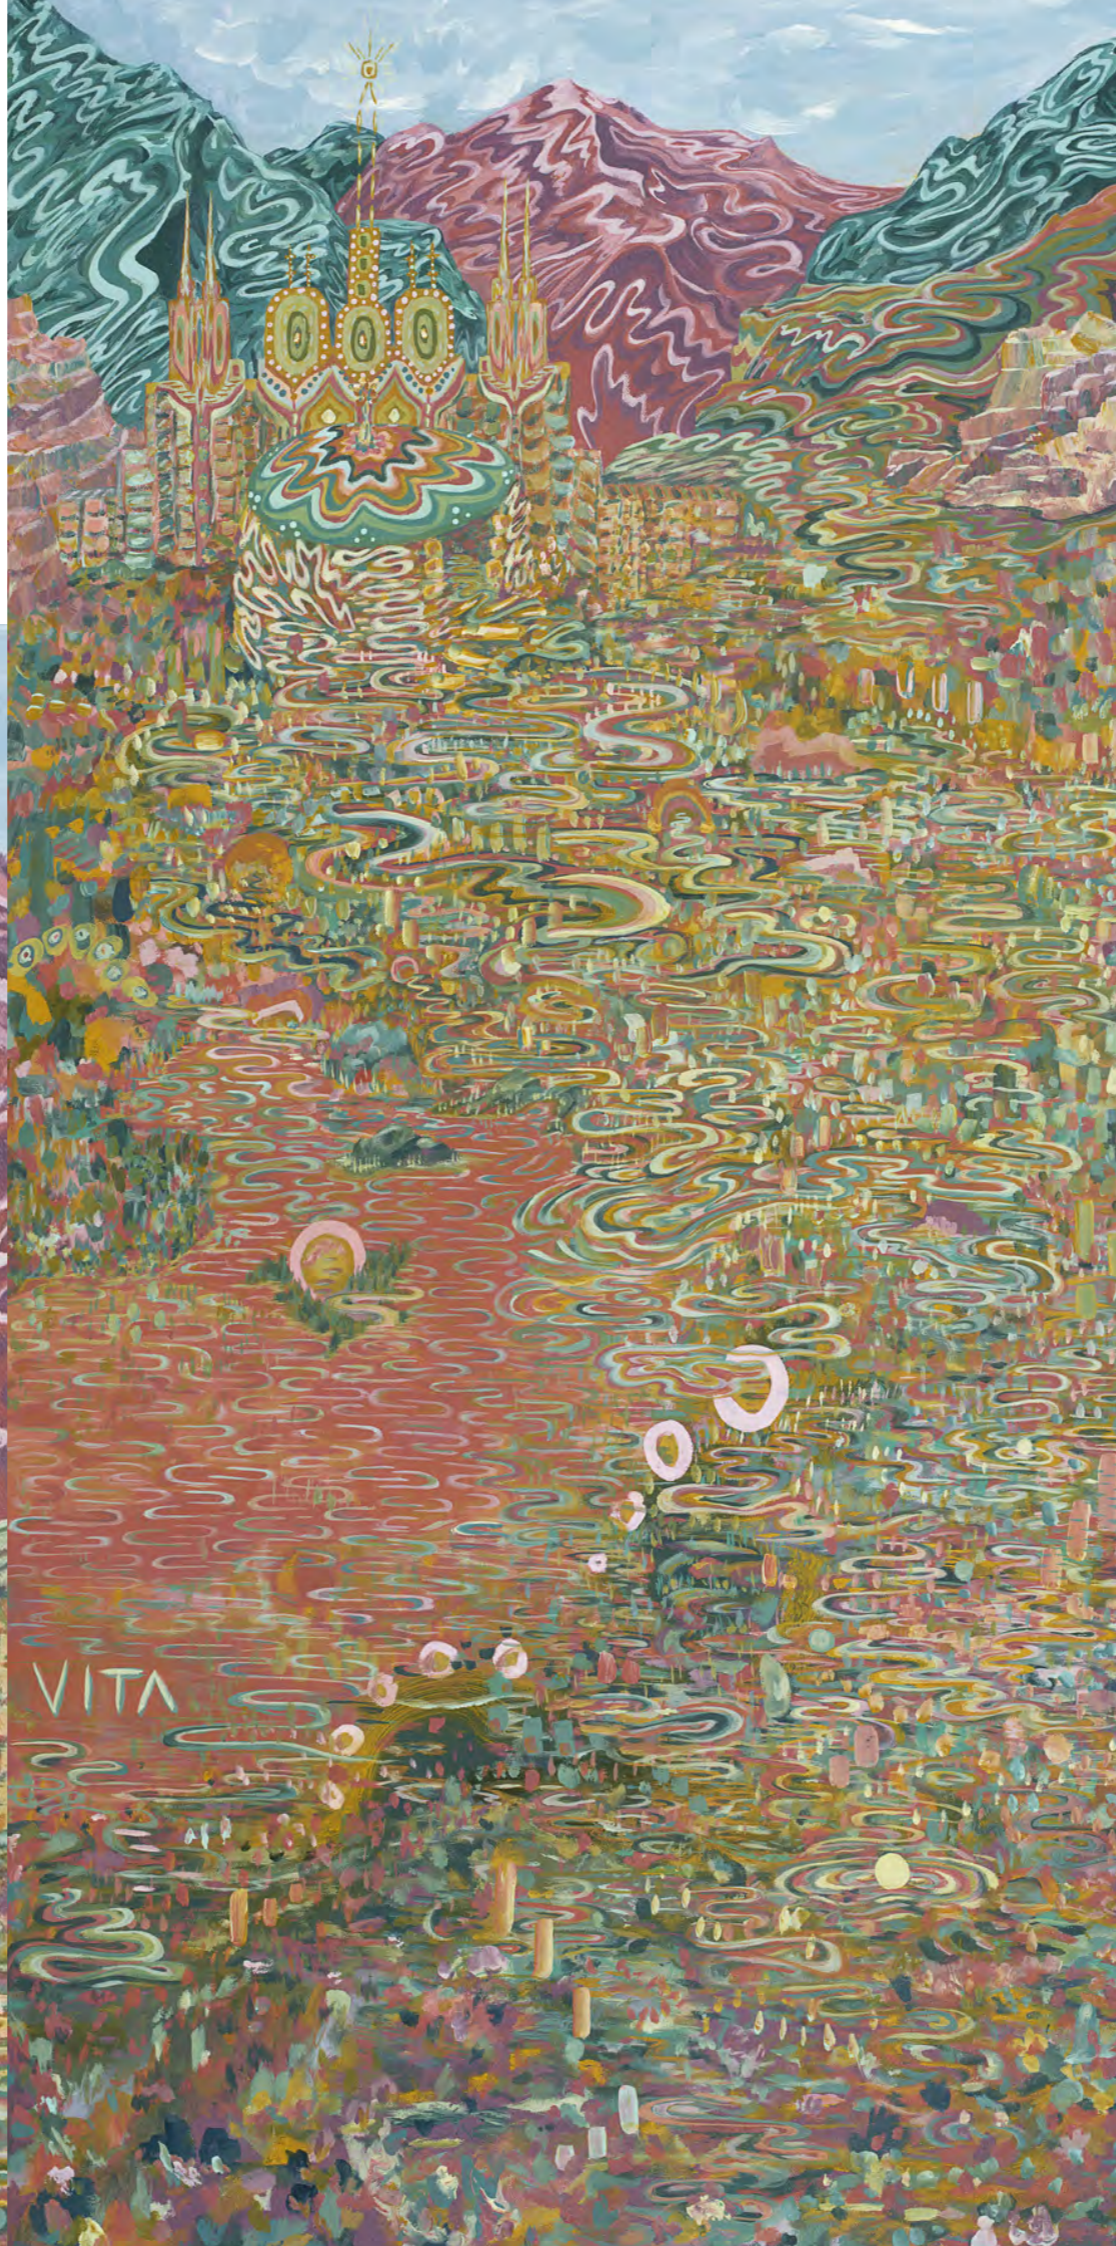

KINGDOM OF DREAMS

24"x48"

Acrylic/Latex on Canvas

Winter 2021-2022

Sold to Private Collection

This piece is a visual narration of the precious, wondrous, and intricate nature of experience.

I once read an anecdote that emphasized something like this : Everyone you pass by at the grocery, sit next to at a stop light, or are driving behind in traffic is someone else's most important person, their clearest vision of why life is still a beautiful thing worth celebrating. This artwork explores the interweaving of microcosmic importance, and the ways that subjective experience bounces off of and blends with other subjective experience. At all levels, whether we are living in a city, are alone in undisturbed nature, or are taking a look on a global scale - we come together in harmony and catastrophe, divinely and objectively equal within the balancing act of the cosmic proportion. The trillions of individual moments that create a collective psyche - the incomprehensibly wide variety, and similarity, between them, is what inspired this piece of art to completion.
