WELLSPRING VII
23"x29"
Acrylic on canvas
2023-2024
\$8,200

The Wellspring series is simultaneously a visual dialogue on water scarcity and resource management ideals in the American West, and a commentary on the Laws of Conservation of Energy/Matter.

Through the lens of desert landscapes, the scale of time and recycling of matter into itself are boldly apparent, and inspires consideration of duality in the eternality and ephemerality of existence as it elates to land, body, and spirit.
